I love XM Satellite Radio and while I do not really listen to the traffic channel yet because it does not cover traffic in the Cleveland Ohio area yet, I believe that this is a good service and wish it was available when I driving as a long haul truck driver, it would have made my driving a lot easier if knew what was going on. For the big broadcasting people to come in and and try to stop this service that I pay for is wrong and should be stopped. The NAB petition 04-160 should be rejected.
